"When is it the best time to publish?" "What are drafting and freewriting and why are they important?" "Do you need to be very knowledgeable to publish?" "Why are some students more successful in publishing than others?" "Why am I afraid to write?" These are some questions that you will find answers to in "The Graduate Student As Writer: Encouragement for the Budding Scholar." As graduate students, you may feel the pressure to write and publish. You may compare yourselves to peers who have already published. Or you want to improve your chances of finding an academic position after graduation. However, the process of writing and publishing is not straightforward and seldom discussed amongst students, leaving many to stumble along and figure things out alone. If you are looking for some heart-to-heart talk from one graduate student to another on the mindset, skills, and process that are needed for effective and efficient writing and publishing, this book is for you. This book simplifies the writing process into four stages: Drafting, Feedback, Rewriting and Editing. It maintains that a graduate student is not merely training to be an academic, but is also a writer and artist. It also addresses misconceptions about writing that can hinder your progress, such as thinking that you must have it all together before you can begin. This book is written with the graduate student from a Social Science field in mind, but students of all fields will find its contents applicable. If you feel discouraged that you're not making progress in your writing, this book with chapters in bite-sized readings will encourage you and give you insights into your fears and inspiration to uplift you. Chapters of the book include: "Writing as a Tool", "Begin Writing at Every Stage of your Graduate Studies", "Start Small Wherever You Are", "Fear of Feedback", and "Value and Enjoy the Process, Not Just the Outcome."

Eric Hayot teaches graduate students and faculty in literary and cultural studies how to think and write like a professional scholar. From granular concerns, such as sentence structure and grammar, to big-picture issues, such as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.'s, and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing. He aims to adjust the writer's perspective, encouraging scholars to think of themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting, yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions, developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.
