In this discourse I will contend that Ayi Kwei Armah's language in his first novel, The Beautiful Ones Are Not Yet Born is deliberately crafted to sound very vulgar for a purpose. The coarse language is used as an electroconvulsive tool to deliberately shock the reader to draw his attention to the decadence and corrupt behaviours Armah exposes and condemns in the novel.

A railway freight clerk in Ghana attempts to hold out against the pressures that impel him toward corruption in both his family and his country.

During the Cold War, the West typically represented socialism as a threat to genuine aesthetic achievement. The essays in this book examine a variety of socialist cultural phenomena from China and the Third World to show that such Cold War depictions of socialism were misleading. The contributors give special attention to the strong anticolonial legacy of socialism and the important role played by socialism in subsequent attempts to build viable postcolonial cultural identities. Included are chapters on creative works from China, Africa, and the Caribbean, as well as the works of multicultural artists from the United States who stand in relation to Third World cultures. While some of the chapters address theoretical concerns central to all socialist cultures, the volume focuses primarily on socialist cultures in those parts of the globe that were never fully inside either the Soviet or the American bloc.

This novel is a treatment of the theme of corruption wrought by poverty. It is the story of an upright man resisting the temptations of easy bribes and easy satisfactions and winning for his honesty nothing but scorn even from those he loves.

How has the state impacted culture and cultural production in Africa? How has culture challenged and transformed the state and our understandings of its nature, functions, and legitimacy? Compelled by complex realities on the ground as well as interdisciplinary scholarly debates on the state-culture dynamic, senior scholars and emerging voices examine the intersections of the state, culture, and politics in

postcolonial Africa in this lively and wide-ranging volume. The coverage here is continental and topics include literature, politics, philosophy, music, religion, theatre, film, television, sports, child trafficking, journalism, city planning, and architecture. Together, the essays provide an energetic and nuanced portrait of the cultural forms of politics and the political forms of culture in contemporary Africa.

The book focuses on contemporary African cities, caught in the contradiction of an imperial past and postcolonial present. The essays explore the cultural role of colonial architecture and urbanism in the production of meanings: in the inscription of power and discipline, as well as in the dynamic construction of identities. It is in these new dense urban spaces, with all their contradictions, that urban Africans are reworking their local identities, building families, and creating autonomous communities – made fragile by neo-liberal states in a globalizing world. The book offers a range of scholarly interpretations of the new forms of urbanity. It engages with issues, themes and topics including colonial legacies, postcolonial intersections, cosmopolitan spaces, urban reconfigurations, and migration which are at the heart of the continuing debate about the trajectory of contemporary African cities. The collection discusses contemporary African cities as diverse as Dar Es Salaam, Dakar, Johannesburg, Lagos and Kinshasa – offering new insights into the current state of postcolonial African cities. This was previously published as a special issue of *African Identities*.
