Looked at as the study of the interaction between living things and their environment, cultural ecology involves human perceptions of the environment as well as the sometimes unperceived impacts of us on the environment and the environment on us. Cultural ecology is all about humans—what we are and what we do, in the context of being another animal on the planet.

Description. Bivalve Molluscs is an extremely comprehensive book covering all major aspects of this important class of invertebrates. As well as being an important class biologically and ecologically, many of the bivalves are fished and cultured commercially (e.g. mussels, oysters, scallops and clams) in a multi-billion dollar worldwide industry. Elizabeth Gosling who has a huge wealth of research, teaching and hands on experience working with bivalves, has written a landmark book that will ...
