However, this new larger book presents approximately 13,000 entries--more than twice the number of words with definitions as the title it replaces. All vocabulary in this book is categorized under different themes. Each theme groups together many different words relating to similar topics, which helps students of French and travelers to France conveniently find words that are related by subject. Among each book's 24 separate subject themes are: business terms, medical terms, household terms, scientific words and phrases, units of measurement, clothing, food and dining, transportation, art and culture, and others.

It presents exercises in sound discrimination and accurate sound creation—for example instructing in pronunciation of French vowel sounds and nasals such as eu and oei, which many English speakers find especially difficult to master. Words and sounds are put into a variety of conversational contexts for students of French to practice and perfect. It provides the added convenience of audio compact discs to replace the old tape cassettes. The book includes the IPA (International Phonetic Alphabet) as a pronunciation guide.

More than 5,000 words and expressions are translated and grouped into useful categories for quick reference. The pocket-size guides in this series present thousands of words and expressions with their English translations. Words are divided according to practical subject themes that include numbers, travel situations, ways of greeting, and many other categories. Words are then listed alphabetically within each category. Foreign language students, international travelers, and general readers of foreign language books and periodicals will find quick, easy-to-locate guidance in these books.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. " A brilliant and thoroughly modern guide to learning new languages. " —Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn ' t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he ' s discovered. Starting with pronunciation, you ' ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You ' ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you ' ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you ' ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
