Research for Educational Change
presents ways in which educational

research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research-generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data, collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research-

generated insights have a tangible, beneficial impact on what is happening in mathematical classrooms.

Combining two discourses – that of researchers speaking to one another, and that of researchers communicating their insights to those responsible for educational practice – the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and

This book offers a critical exploration of definitions, methodologies and ideologies of English-medium instruction (EMI), contributing to new understandings of translanguaging as theory and pedagogy across diverse contexts. It brings together a number of conceptual and empirical studies on translanguaging in EMI at different educational levels, in a variety of countries, with different approaches to translanguaging, different named languages, and different policies.

These studies include several underrepresented contexts across the globe, providing a broad view of how translanguaging in EMI is understood in these educational settings.

Furthermore, this book addresses the complexities of translanguaging through a discussion of the
