This book establishes, and then analyses, the interrelation between series and dependence by focusing on two aspects of their connection: the overconsumption of TV series, and the production devices that lead to it. Due to its two-sided nature, the volume brings together specialists from different backgrounds. On the one hand, it involves people working with addiction, such as psychiatrists, psychologists, and social workers, whose analytical tools and statistics are extremely useful in assessing the prevalence of TV series addiction, as well as its consequences, in order to make sense of its mechanics. For similar reasons, the authors also include professionals working with children and teenagers, since youths under 18 are largely affected by addictive tendencies. On the other hand, other contributions here are authored by TV series specialists, producers and scriptwriters, as well as academics in the fields of film and TV series studies, cultural studies, and narratology. Their specific perspectives on the topic help better understand what it is about the construction or reception of TV series that aims to create, maintain, amplify, or, on the contrary, curb their ingrained addictive effects.

This book takes an intersectional approach to explore gender, race, ethnicity and social class in television series and films produced by English-speaking countries. Starting from Kimberlé Crenshaw's 1989 concept of

intersectionality, and encompassing film studies, television studies, cultural studies, gender studies, Queer theory, African American studies, and post-colonial studies, this volume sheds light not only on revealing intersectional elements of on-screen fiction, but also on the very nature of intersectional criticism.

Fantascienza - rivista (99 pagine) - Fantascienza in streaming - Alita - Karma City Blues - La vittoria impossibile - Michael Moorcock - Larry Niven In che modo lo streaming ha rivoluzionato la fantascienza televisiva? Cosa hanno portato le piattaforme come Netflix, Amazon Prime Video nel mondo della science fiction? Sono delle delle domande che ci siamo posti e che abbiamo provato a rispondere con lo speciale del numero 204 di Delos Science Fiction. Di sicuro alcuni effetti sono sotto gliocchi di tutti: il moltiplicarsi di canali, il numero sempre più crescente di serie televisive di fantascienza, la globalizzazione dei mercati di contenuti audiovisivi. Insomma, è in atto un processo che sta rivoluzionando il nostro modo di guardare la fiction, che ormai non passa più per un televisore ma anche per altri schermi, come quelli di uno smartphone, di un tablet o di un computer. Marcello Rossi, uno dei maggiori esperti italiani di serie televisive, ha tracciato un quadro della situazione di questo fenomeno, definendo tale momento storico come l'età dell'abbondanza, termine usato per primo da John Ellis, uno dei maggiori studiosi di televisione. Lo speciale fa poi il punto sull'attuale momento della fiction televisiva prodotta in casa Marvel, ad opera di Arturo Fabra, e offre anche una piccola guida alle serie di fantascienza del momento, che vanno in onda rigorosamente in streaming. Dello stesso argomento si occupa anche il curatore della rivista Carmine Treanni. L'uscita per Delos Digital di Karma City Blues, il nuovo romanzo di Giovanni De Matteo, uno dei nostri maggiori autori di fantascienza, non poteva lasciarci indifferenti e abbiamo intervistato l'autore su questa sua ultima fatica letteraria. Il film del momento è senza dubbio Alita - Angelo della Battaglia, diretto da Robert Rodriguez, tratto dall'omonimo manga di Yukito Kishiro e prodotto e voluto fortemente da James Cameron. Sempre nei servizi, ci occupiamo anche di una delle antologie più interessanti ed originali apparse negli ultimi tempi: La vittoria impossibile, curata da Andrea Pelliccia e che presenta 13 storie di Ucronia sportiva. Nella sezione rubriche, proprio Pelliccia si occupa, in una nuova rubrica dal titolo Contaminazioni, dello scrittore Michael Moorcock e delle connessioni che ha instaurato con la musica. Gian Filippo Pizzo, noto negli ultimi anni per essere il curatore di apprezzate antologie collettive, si pone, nella rubrica Roundtable, e rivolge ad alcuni personaggi del mondo della fantascienza una domanda provocatoria: perché la fantascienza non viene capita? Donato Rotelli, già collaboratore di Fantascienza.com, apre le danze con una rubrica dedicata a quegli scrittori che hanno scritto fantascienza, ma non sono propriamente identificati con questo genere della letteratura. si parte con Oliver Sacks. Infine, Roberto Paura fa il punto sul computer quantistico con l'ottica della futurologia. Il racconto di questo numero è di Fabio Aloisio. Rivista fondata da Silvio Sosio e diretta da Carmine Treanni.

A deep dive into Italy's storied league. "An excellent book . . . Anyone with an interest in football beyond the playing pitch will find it fascinating." "Game of the People In the 1980s and 1990s, Serie A was known as "Il campionato più bello del mondo"the most beautiful championship in the worldand had the highest match attendances in Europe. The stadiums were not only full of people, but full of color, flags, songs and rituals. Italy hosted World Cup 1990 and the stadia and stars on show in Serie A became iconic. Across the ten year period from 1989 to 1999 a remarkable 10 different Serie A clubs occupied nearly half the places in the finals of the Champions League and Europa Cup. They were dominant. But then in the 2000s they began to fall behind and despite the Azzurri winning the World Cup in 2006 and Inter Milan winning the Champions League in 2010, Italian football was on a downwards trajectory that saw the national team fail to qualify for the 2018 World Cup, their first absence from the tournament since 1958. What happened and why? In this extraordinary book, Steven G. Mandis

investigates. Given unprecedented behind-the-scenes access to Italian clubs and key decision makers and players, Mandis is the first outside researcher to rigorously analyze both the on-the-pitch and business aspects of a club and league. What he learns is completely unexpected and challenges popular explanation and conventional wisdom.
